

For more than 20 years, our client has been helping the healthcare industry provide better and efficient service to patients

As a Frontend Software Engineer, you will be operating in an Agile SW Development environment, helping define and build our new Service Oriented Platform, and enable solutions that service our internal systems as well as our external partners.

What your work day will look like:

- Identify, prioritize and execute tasks in the software development life cycle
- Work with business to iterate over software requirements
- Develop tools and applications by producing clean, efficient code
- Automate tasks through appropriate tools and scripting
- Analyze and debug systems
- Perform validation and verification testing in a test-driven manner
- Review the work of others, and invite others to review your work
- Collaborate with internal teams and vendors to fix and improve products
- Ensure software is up to date with latest technologies

Qualifications we are looking for:

- Minimum **5 years of JavaScript** development experience building web applications including utilizing web service APIs
- **Minimum 2 years of ReactJS** development experience.
- Deep knowledge of **HTML 5, CSS 3** and related web technologies like Sass/Less, AJAX and JSON
- Experience writing functional tests using web testing frameworks including jest and react testing library
- Excellent organization, critical-thinking and personal leadership skills
- Self-starter with the ability to deliver with minimal supervision
- Being okay with the uncomfortable feeling that comes from learning new things
- Team player
- Analytical mind with problem-solving aptitude

Bonus points for:

- Experience with **C#.NET**
- Experience in leading a team or mentoring other engineers
- Experience in maintaining a single website or product for more than one year
- Familiarity with **D3, Highcharts**, or other charting packages
- Experience writing automated tests (e.g. **Jest**)
- Familiarity with **ES8** (ECMAScript 2017)
- **Material UI**
- Experience with **AWS/Azure cloud services** or equivalent
- **Experience working on a SaaS products**
